

North Carolina farm owner Johnny Barnes supports the program and sent manager Bryan Salmons to the first session. “Unlike growers in the Midwest, many of us are running labor-intensive specialty crop operations. We needed a program targeted to the challenges we face.”

Specifically designed programs for your farm’s unique situation

Every farm has unique risk management and marketing needs. For example, produce and tobacco farms are labor intensive. They need to focus on HR management. Large-scale field crop farms are capital intensive. Intense evaluation of capital investments is critical for them.

Each Executive Farm Management program is designed around the specific needs of a particular type of operation. Do you want to grow your business? Don't delay, register today for our 2019 program.

You run a complex, decision-intensive, multi-generational farm operation.

Are your management and leadership skills keeping pace?

The Executive Farm Management Program

Strengthen your skills. Grow your family business.

Honing your business management and leadership skills is one of the best investments you can make. We can help.

Why The Executive Farm Management Program?

You run and finance a large and diverse business. You manage capital, handle labor issues and navigate an ever-expanding sea of regulations. You're busy working in your business. The Executive Farm Management Program is designed to help you work *on* your business.

Customized, Interactive Learning

We offer a highly facilitated learning environment which draws upon custom content presented in an interactive, team-based format. Limited participant size allows for one-on-one coaching, designed to meet the specialized needs of Southeastern farmers like you.

Expert Instructors

Our business and management experts provide tools and resources to sharpen your skills and grow your family business.
